- English
- hindi
- gujarati

PROFILE

I turn complex ideas into clean, user-friendly web apps using HTML, CSS, JavaScript, React.js , Tailwind CSS, Bootstrap. I'm always learning and exploring new tools to stay updated in frontend development.

PROJECTS

E-commerce Product Page

- Spearheaded the front-end development of a dynamic, responsive product detail page for an e-commerce platform using React.js and Bootstrap. Leveraged JavaScript to render content dynamically, enhancing the user interface and contributing to increased user engagement and conversion rates.

social media application

- Designed and developed the front end of a responsive social media web app using React.js, JavaScript, and Tailwind CSS. Key features include user authentication, editable profiles, real-time post feeds, likes/comments, dark mode,and follow functionality. Utilized React Router for navigation and Context API for state management to deliver a smooth, mobile-friendly user experience.

Personal Portfolio Website

- A personal portfolio showcasing my skills, projects, and experience as a developer. It includes live project demos, technical skills, and a contact form for potential employers or clients to get in touch.
